

Good idea,
better IT.

Data Center Services

Ondit aims to provide tailored solutions to assist you in overcoming the ever-increasing challenges IT departments face, ranging from basic monitoring to complete out-tasking and outsourcing. Thanks to our years of **expertise** in combination with our **dynamic** and **efficient** approach, Ondit offers a tailored solution for every client.

Advantages

- Plenty of power, space and cooling
- Access to multiple carriers and strong networks
- Backup support services distributed geographically
- Built on IBM quality
- Green power

Eliminate the need for a dedicated computer room by placing your equipment in our data centers. Our data center rooms are tailor-made to accommodate high-end systems, with plenty of air conditioning capacity, backup power and redundant WAN connections. These data centers are equipped with carriergrade security systems and smoke and fire prevention. We monitor your systems around the clock, so you can focus on your core business.

The Data Center Services offer includes:

Housing

- Place your equipment in our data center, and connect it to our high-speed internet uplinks so your users get the best performance
- From 1 rack unit up to private rooms
- Monitoring, system management, off-site tape vaulting and other services available
- Use your own security equipment or share our managed redundant firewalls

Hosting

- Free yourself from capital expenditures and only pay for the capacity you need
- Dedicated servers: rent your own unshared server, managed by your or our experts
- Virtual dedicated servers: securely host your workloads on our shared infrastructure
- Create a dynamic platform to host your software as a service with us. Our dynamic pay-as-you-go infrastructure scales up or down with your application
- Use our firewalls and load balancers to further increase your available time

Remote Backup and Disaster Recovery

- Replicate your data to our data centers for optimal security
- Quickly switch to our servers using standby capacity in case of disaster
- Test and fine-tune your business continuity plans without impacting your live infrastructure
- Securely connect your site with ours through direct connections or through a secure VPN connection

Contact us if you want to receive more information about our services.
